

NTT Security: A Center of Excellence for Security Services

Who we are

NTT Security is the specialized security company and center of excellence in security for NTT Group. As an NTT Group company, we're part of one of the largest information and communications technology (ICT) companies in the world. With a direct presence in over 90 countries, an annual R&D investment of \$2 billion and more than 280,000 employees, we are part of a stable, profitable, and well-respected global organization.

What we do

We deliver integrated security solutions through NTT Group companies worldwide (NTT Communications, NTT DATA and Dimension Data). We specialize in managed security services and consulting that enhance and extend the wider services provided by NTT Group companies.

The NTT Group companies are responsible for taking our services to market globally. By harnessing our global capabilities in advanced analytics, threat intelligence, and security expertise, together we develop and deliver innovative security capabilities and services.

Our services portfolio covers every aspect of specialized managed security services and consulting services to help you reduce risk and embrace digital transformation. By working together with NTT Group companies, from initial assessment through to strategic program planning, hands-on deployment and 24/7 management and support, we deliver these services using local resources that leverage our global capabilities with a track record of on-time, on-budget delivery of projects.

Delivering agile security for resilient business solutions

All NTT Group companies aim to provide their clients with resilient business solutions. When you work with any NTT Group company you can be assured that NTT Security is committed to delivering cybersecurity solutions as part of each NTT Group client engagement. NTT Group companies rely on us to have the right people, process and technology in place to be able to quickly understand and deal with their clients' security-related business challenges and requirements.

We leverage talent and expertise across the group to continuously look at innovative ways to help NTT Group clients improve their security posture. Together we have expertise in every aspect of business, from infrastructure through to applications; data analytics to cloud and the internet of things (IoT).

Being part of the NTT Group gives us unparalleled insight to global threats. With joint R&D activities, threat analysis, threat reporting and threat intelligence through collaboration between our Global Threat

Intelligence Center (GTIC) and the NTT Group Global Threat Intelligence Platform (GTIP), we provide relevant information needed to make informed decisions around risk and security.

Managed Security Services (MSS)

Our Managed Security Services (MSS) are designed for NTT Group global enterprise clients who need to outsource elements of their security operations.

We possess best-of-breed capabilities to deliver a diverse array of managed security services. We capture, store, automate and analyze logs, meaning that you're a step closer to finding that malicious needle in a haystack. We use our state-of-the-art artificial intelligence, machine learning, and global threat intelligence to detect threats and process mountains of data to pinpoint what's important to your business. We also add human enrichment to carefully validate what we find.

Our security experts will monitor and manage assets 24/7, giving IT teams more time to focus on the strategic development of their business.

By turning huge volumes of data into useful intelligence, we help NTT Group clients to see the whole picture rather than isolated events. Security experts at our Security Operations Centers (SOCs) work 24/7 to proactively protect organizations against multiple, complex security threats.

Strategic and Technical Consulting

Through our proven Global Enterprise Methodology (GEM), we enable NTT Group clients to understand their current risk exposure and make informed decisions for continuous risk management.

Our Strategic Consulting provides executive guidance on compliance, independent risk assessments and risk remediation as well as supplementary and integration services. Furthermore as a pure-play end-to-end security provider, our approach to Technical Consulting includes skilled guidance on day to day compliance, best practice technical assessment and implementation on a wide range of business challenges; and immediate incident response and remediation.

Our consulting teams bring real-world expertise to projects and security control implementations.

Our unique capabilities

Advanced Analytics

The only way to respond to the ever changing threat landscape is to transform the efficiency of detection and response. We use our state-of-the-art artificial intelligence, machine learning, big data, and complex event processing analysis to process petabytes of data and ensure that this is searchable and retrievable for clients. We also add human enrichment to carefully validate and apply context to what we find.

Threat Intelligence

A collaboration between our global Security Operations Centers (SOCs), our Global Threat Intelligence Centers (GTICs) and our Global Threat Intelligence Platform (GTIP) allows for complete analysis of information to provide current, emerging and applied threat intelligence. We'll ensure that we give this intelligence the right level of context, depending on the industry, market, and business model to make this relevant to each organization.

Security Experts

Fifteen hundred NTT Security experts all work towards one common goal – to build and deliver world-class security services for NTT Group clients. Our team covers the entire range of security expertise including security system developers, engineers, architects, data scientists, researchers and certified security consulting practitioners.

We also work collaboratively with colleagues from NTT Group companies who take our services to market, including NTT Communications, NTT DATA and Dimension Data as well as other centers of excellence within NTT Group such as the NTT Innovation Institute.

Innovation

Innovation is at the heart of what we do. But we don't innovate for the sake of it. We collaborate with our talented colleagues in the NTT Group and their clients to bring innovative ideas to the forefront.

Our people

Our exclusive focus on cybersecurity enables us to attract the world's most experienced security experts who are passionate about cybersecurity and risk management, and want to work at the leading edge of this industry. As the center of excellence in security for NTT Group, we employ a team with real life experience at all business levels – from CISOs of world-leading companies to specific compliance and technology specialists.

Together, in partnership with other NTT Group companies we deliver the very best managed security services, security consulting services and security technology for NTT Group clients.

About NTT Security

NTT Security is the specialized security company and the center of excellence in security for NTT Group. With embedded security we enable NTT Group companies to deliver resilient business solutions for clients' digital transformation needs. NTT Security has 10 SOCs, seven R&D centers, over 1,500 security experts and handles hundreds of thousands of security incidents annually across six continents.

NTT Security ensures that resources are used effectively by delivering the right mix of Managed Security Services, Security Consulting Services and Security Technology for NTT Group companies – making best use of local resources and leveraging our global capabilities. NTT Security is part of the NTT Group (Nippon Telegraph and Telephone Corporation), one of the largest ICT companies in the world.
