

SECURITY CONSULTING SERVICES

Strategic Consulting

The digital business landscape creates numerous opportunities to drive innovation and growth, reduce barriers to trade, reach new customers and share knowledge to collaborate across international boundaries. However, with these opportunities come risks that the data and systems we rely upon will be compromised or damaged in ways that are difficult to detect or defend against.

Many organizations find external advice invaluable to evolve a clear, comprehensive, and business-focused security strategy. When they need to support the business to navigate new, profitable ways of working they choose NTT consulting services. We make a difference by combining our collective knowledge of the global business and threat landscapes to deliver the best strategic solutions.

NTT delivers cybersecurity consulting that focuses on independent risk assessments, skilled guidance on compliance and risk remediation as well as Enterprise Security Program Services (ESPS).

Our people

Because information security and risk management is all we do, a growing number of the world's most skilled, knowledgeable practitioners choose to

work at NTT. Our strategic consulting services are executed by experienced, senior practitioners with a proven track record in defining and communicating risk, and delivering impactful security programs sensitive to the individual needs of each business. From CISOs of world-leading companies to specific compliance and technology specialists, our experts are certified, up-to-date and ready to share their knowledge with you.

Our delivery approach

Using our proven Global Enterprise Methodology (GEM), we enable your organization to understand its current exposure and make informed decisions for continuous risk management. We'll help you to identify risks, optimize the use of available resources, align risk management with commercial goals and achieve compliance. And because we don't just talk about security, but deliver practical solutions measured against the agreed controls – we are with you every step of the way to manage the necessary changes.

Risk Assessment

NTT risk assessment services identify your current risk exposure and the actions to be taken to move you to a state of continuous risk management, aligned to your business goals. Security vulnerabilities in multiple areas including compliance, infrastructure security, data security, application security, device security, identity and access management, cloud security, operations and third party risk can be examined as part of the assessment.

Figure 1: Our proven Global Enterprise Methodology frames NTT consulting engagements, enabling your organization to understand its current risk exposure and make informed decisions for continuous risk management.

NTT Strategic Consulting provides ultimate value

- Works with you to deliver all, not part of the solution
- Drives results using our highly effective Global Enterprise Methodology delivery approach
- Highly experienced in strategic and practical risk and security management
- Trusted advisor to sophisticated and complex organizations worldwide

Architecture Assessment & Design	✓	• Ensures that security architecture and design align with risk, compliance, and commercial goals
Technology & Controls Selection	✓	• Optimizes existing systems and rationalizes technology estate

Recommendations for addressing any security vulnerabilities identified are provided in the form of a report, road map and presentation.

CISO Advisory Services and GRC programs

NTT advisory services provide organizations with experienced senior consultants familiar with international compliance frameworks such as ISO 27001, SANS, NIST, CMM and GCHQ to serve as a member of your trusted executive team. Services can be provided with a specific focus, including governance, risk and compliance programs (regulatory and non-regulatory), review planning, providing research and independent input, building business cases and participating in advisory or oversight boards.

Transforming services for improved business resilience

Our transformation services adapt security programs and adopt controls that support new cloud activities and SaaS applications, as well as mobile and social initiatives.

Security Strategy Development

NTT consultants work with you to develop a long-term security road map, aligned

with business and compliance objectives and digital transformation initiatives. NTT can build your long-term security strategy for you.

Security Program Development

NTT advises organizations on how to get the most from people, processes, and technology, based on our global experience of successful security program development and delivery.

Security Architecture Assessment and Design

Following a review of existing architecture, assets, applications, processes, and infrastructure, NTT prioritizes a set of recommended activities and security programs that directly align with risk, compliance, and commercial goals.

Technology and Controls Selection

NTT works alongside clients using experience and proven processes to optimize existing systems, reduce the complexity and cost of existing infrastructure, and rationalize the technology estate.

NTT Strategic Consulting brings wider NTT Group benefits to provide unique capabilities

- \$2bn invested annually in global R&D activities to respond to the changing threat environment
- Large resource base of certified security experts
- Unique threat intelligence – scanning the global threat landscape and creating the threat feeds and signatures utilized by our analysis engines

NTT Strategic Consulting client deliverables

- Executive reporting to demonstrate risk management diligence
- Highlights potential gaps in risk management to allow informed decision making
- Business case and program development to justify risk management investment as part of a security strategy
- Confidence that compliance is met and best technology and applications are being utilized
- Flexibility to evolve consulting services to managed security services with one trusted leading global provider
